1953 NORM FULFILLMENTS -- Moscow, Izvestiya, 27 Nov 53

The Bol'shevik Mine fulfilled its 1953 plan on 26 November 1953. Ore output was 12.2 percent over the 1952 output. The man-hours per ton of ore mined decreased by 44 percent over last year.

Moscow, Izvestiya, 23 Dec 53

The Chiatura miners filled their 1953 manganese ore output plan ahead of schedule.

MONTRLY NORM FULFILLMENTS -- Yerevan, Kommunist, 1 May 53

Mine 1-2 of the Zangezur Mine Administration has topped its April 1953 norm by 10 percent.

Yerevan, Kommunist, 8 Oct 53

The Khrda Mine of the Zangezur Mine Administration had long been unable to fulfill its production norms. In recent months, however, the mine has not only met but overfulfilled its norms. Its August-September 1953 output is 20 percent above its first quarter 1953 output. The productivity of labor is 15 percent above plan. The September 1953 ore output norm has been met by 112.2 percent.

Tbilisi, Zarya Vostoka, 10 Oct 53

The Mine imeni Lenin, twice the winner of the transferable Red Banner in 1953, is challenging the Chiatura mines to socialist competition. Sector No 5 the mine is now shipping 400-420 tons of manganese ore per shift instead of the planned 320 tons. Sector No 10 is meeting the daily norm by 110-115 percent.

Tallin, Sovetskaya Estoniya, 19 Apr 53

The Tashtagol Mine, the largest in the Kuznetsk Metallurgical Combine, has attained high economic indexes.

NEW MINING METHODS -- Kiev Pravda Ukrainy, 12 May 53

The miners of the Bol'shevik Mine drill an average shift rate of 0.35-0.36 linear meters. The norm is 0.33 meters. PA-23 drills are in use; some of these drills are equipped with tandem drill heads.

Moscow, Izvestiya, 6 Jun 53

PR-51 hammer drills are in use at the Bol'shevik Mine. Half the miners are using the multihammer drill method. Every fifth ton of ore mined during June 1953 was over plan.
